

*Advanced Manufacturing Technologies Lab Opening Ceremony*

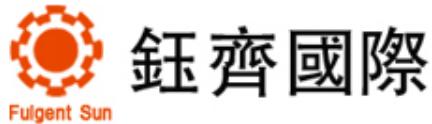

## **Fulgent Sun builds the Taiwan's first "Advanced Manufacturing Technologies Lab" for footwear in collaboration with Yun Tech University.**

2018 / 09 /14, Douliu

Fulgent Sun International (Holding) Co., Ltd. ("Fulgent Sun", TWSE: 9802) and National Yunlin University of Science and Technology build the Taiwan's first "Advanced Manufacturing Technologies Lab" under the "High-Level R&D Talent Training Laboratory" project plan. The footwear -making technology laboratory opening ceremony was held today by Wen-Chih, Lin, Chairman, Fang-Chu, Liao, General Manager, Chwen-Tzeng, Su, Yun Tech Vice President, Chuan-Yu, Chang, President for Research & Development and Chien-Chou, Lin, Professor. In the future, the "Advanced Manufacturing Technologies Lab" will integrate the resources with the governments, industry, and academic sectors. In addition to the establishment of the footwear production line, self-developed in more integrated industry 4.0 of footwear industry automation equipment and technology, Yun Tech University will open cross-disciplinary "Advanced footwear Technology Course", training the professionals in all functional fields for the new generation of footwear industry. Fulgent Sun also provides various internship opportunities at home and abroad, in order to increase the experience of practical experience, and then strengthen the international highly view and leadership capacity, and hope this project will cultivate more professionals for the Taiwan footwear industry and strengthen the global leadership of Taiwan footwear industry.

Advanced Manufacturing Technologies Lab was established by Ministry of Education, Fulgent Sun and Yun Tech. Chwen-Tzeng, Su, Vice President of Yun Tech University, said that we effectively train talent with abundant R&D resources. This time, the funds of government and corporate will be invested in the construction of footwear production lines on the campus, and the outdoor functional footwear manufacturers with higher technical content of shoes is connected with the school teachers for lecture. In the era of the global wave of Smart Industry 4.0, we will not only integrate academic theory and practice but also cultivate talents of Taiwan footwear industry. Through cross-domain integration, research and development of the latest semi-automation and automation technology, and aiming at smart manufacturing as a project goal, we hope that Taiwan footwear industry maintain a leading position in the rapidly changing market competition in the world.

Wen-Chih, Lin, Chairman of Fulgent Sun pointed out that the global footwear industry still depends on a large number of labor and manpower at the current production process. The automation technology still has a lot of space for improvement. Because it is easy to encounter the lack of high-level management talents with sufficient shoe production technology in the business management, "continuously cultivating

in diverse talents and moving towards intelligent production mode" has always been a major operational strategy of the Group. Fulgent Sun has been engaged in a number of industry-university cooperation cases with a number of domestic quality universities. We hope that the implementation of the "Production Line" construction operation provide more accurate industry experience by establishment of Advanced Manufacturing Technologies Lab. Multi-disciplinary faculty and equipment in the school can make students take into account theory and practice in the learning process. They will be able to develop their strengths at the workplace in the future. For the company, it will fulfill corporate social responsibility, strengthen the company's software and hardware, create core competitive value, and create a century-old stable operation.
